## Fayette Pipe

## SCOPE

Covers black electric-resistance welded Grade A pipe with nominal wall thickness as shown. Pipe is intended for mechanical and pressure applications and is acceptable for steam, water, gas, or air lines. Pipe is suitable for roll grooving, welding and threading. Produced to the latest revision of ASTM A53A/53M ASME B36.10M. All products are UL listed and FM approved.

## TENSILE REQUIREMENTS

| Tensile Strength min. | 48000 psi |
| :---: | :---: |
| Yield Strength min. | 30000 psi |
| Elongation in 2" | Refer to A53 Table $\times 4.1$ |

## BEND TEST

For NPS 2" and smaller a length of pipe shall be capable of being bent cold through $90^{\circ}$ around a cylindrical mandrel twelve times the size of the outside diameter without developing cracks or opening the weld.

## FREQUENCY OF TESTS

Tensile tests are required on $1 / 500$ lengths of pipe for each size.

## END FINISH

| Plain End: | Mfg. Option |
| :---: | :---: |
| Threaded: | To ANSI Standard B 1.20.1 |
| Coupling: | To ASTM Standard A865 |

## PRODUCT MARKING

Each length of pipe is continuously stenciled to show the manufacturer, the grade of pipe (ASTM A53), the kind of pipe (E for Electric Resistance Welded, A for Grade A), and length.

Each bundle of STD A53 will have a tag securely attached showing quantity, run \#, and dimensions.

## HYDROSTATIC \& NONDESTRUCTIVE ELECTRIC TESTING

Hydrostatic inspection test pressures for plain-end pipe are listed in Table $\times 2.2$ of the A53/A53M specification. Test pressures shall be maintained for a minimum of five seconds.

Nondestructive electric testing of the weld seam is performed on all sizes of pipe.

## (MIC)DDARMS ANTIMICROBIAL COATING

Fayette Pipe applies our Mic Defense coating to all pipe that we manufacture. This coating serves as a protective barrier limiting the opportunity for corrosion from microbiological organisms. The lasting benefits from this coating can be ensured through additional and routine treatment options.
